Who We Are
Established in 1980 as the Center for Population Options, Advocates for Youth champions efforts to help young people make informed and responsible decisions about their reproductive and sexual health. Advocates believes it can best serve the field by boldly advocating for a more positive and realistic approach to adolescent sexual health.

What We Believe
Advocates for Youth envisions a society that views sexuality as normal and healthy and treats young people as a valuable resource.

The core values of Rights, Respect, Responsibility® (3Rs) animate this vision—

- **Rights:** Youth have *rights* to accurate and complete sexual health information, confidential reproductive and sexual health services, and a secure stake in the future.

- **Respect:** Youth deserve *respect*. Today, young people are largely perceived as part of the problem. Valuing young people means they are part of the solution and are included in developing programs and policies that affect their well-being.

- **Responsibility:** Society has the *responsibility* to provide young people with the tools they need to safeguard their sexual health, and young people have the responsibility to protect themselves from too-early childbearing and sexually transmitted infections (STIs), including HIV.
Parent-Child Communication Resources for
Asian/Pacific Islander, Native American, and Latino Families

This bibliography focuses on parent-child communication about sexuality issues for Asian/Pacific Islander, Latino, and Native American families. The bibliography includes curricula, pamphlets, booklets, research, videos, and music.

Parent-child communication materials for Latino families appear to be more prevalent than are materials for the other populations. As Latinos become a larger proportion of the population in the United States, many organizations are developing materials in Spanish. According to the National Latina Institute for Reproductive Health, Latinos in the United States are disproportionately infected and affected by AIDS. The female population is 8.4 percent Latino, yet Latinas constitute 21 percent of all women with AIDS.

Communication between parents and their children is increasingly important in today’s society. Research indicates that teens who talk with their parents about sexuality are more likely to delay the initiation of sexual intercourse and more likely to use contraception and protection when they become sexually active. Issues of sexuality are much larger than pregnancy prevention. Currently, one in four HIV infections in the United States occurs in people under the age of 21. Classic STDs such as gonorrhea and syphilis are increasing disproportionately among urban minority populations in the United States. Chlamydia, herpes, and genital warts appear to be rampant in the teen population. The threat that these diseases pose for adolescents, especially minority teens, is significant especially to future childbearing and relationships. Qualitative and quantitative communication between parents and their children is vital for adolescent well being and reduction of sexual risk-taking behaviors. Most teens tell us that they want their parents to talk to them, but unfortunately communication around issues of sexuality can be uncomfortable for many parents.

Numerous research studies have shown that increased parent-child communication leads to a raised awareness and reduction in risk taking behaviors.

- Parents who transmit clear messages about sexual conduct, the value of school, and the adverse consequences of risk-taking behaviors have teens who describe themselves as low frequency participants in risky behaviors.1,2,3,4
- Teens who report previous discussions of sexual matters with parents are seven and a half times more likely to feel able to communicate with a partner about AIDS than those who have not had such discussions with parents.5
- A study of Hispanic teens found that 77 percent of pregnant females reported having their first sexual experience by the tenth grade, compared with less than 20 percent of the non-pregnant teens. Among these young women, pregnant teenagers had significantly poorer communication with their mothers than their non-pregnant peers.6
- Good relationships between adolescents and parents are consistently associated with positive emotional functioning and healthy self-esteem.7,8
- In a national sample of parents, 54 percent reported never talking with their children about sex, 28 percent said discussions rarely occur, and five percent had discussions once a year.9
- A significant majority of children and parents report dissatisfaction with the quantity and quality of family discussions about sexual issues.5
- In a recent survey, 84 percent of women polled indicated that they needed help talking to their children about sex and less than two percent believe parents are doing an excellent job in educating their kids about sexuality.10
- According to a Center for Disease Control and Prevention update to a research study on patterns of condom use among adolescents, teens who never discussed condoms with their mother or who discussed condoms after initial sexual intercourse were three times less likely to use a condom than those who had better timed conversations.2,11

Many organizations have materials pertinent to general sexuality issues, but few specifically relate to parent-child communication, thus revealing the need for further resource development in this area. There is a strong need for parent education and communication skills development to aid in the reduction of risk-taking behaviors that can lead to HIV/AIDS, and adolescent pregnancy.

   - Sexual Cultures and the Construction of Adolescent Identities, 1994. This book “describes the diverse worlds in which teenagers negotiate sexual pleasure and adventure, sexual danger and confusion. It encourages a close examination of the varied sexual cultures of adolescents so that we may more effectively plan programs, policies, and everyday conversations with them.” It’s operating premise is that “we want more than for some adolescents merely to survive an epidemic.” Discusses issues that include, but are not limited to, Asian-American and Latino populations.

   - The *Families, Adolescents, and Children Training (FACT) Resource Kit*. The materials in this kit form a comprehensive approach to addressing sociocultural barriers to health care at the individual, family, provider, institutional, and community levels. The complete package includes:
     - *About Adolescence: Changes and Choices* – curriculum and award-winning video *Coming of Age* for teens and parents about self-care during adolescence. Curriculum is bilingual, Spanish and English; video is in English.
     - *Strengthening Families* – skill-building curriculum to improve Hispanic family communication and parenting skills.
     - *Structural Family Therapy* – guide for counselors working with Hispanic youth and families.
     - *Delivering Preventative Health Care to Hispanics* – guide for health professionals serving Hispanic clients.

   - *La Tardeada – Educating Youth About HIV/AIDS*. This video and discussion guide package is designed for community educators working with Hispanic youth. The video, conceived and developed by Hispanic youth, depicts real-life situations and options for negotiating the avoidance of risky behavior in order to prevent HIV transmission. The discussion guide provides the community educator with necessary background information.

   - *El Fortalecimiento de las Familias: Programa para Padres Hispanos*. This curriculum focuses on strengthening Hispanic parents’ skills (within a context of cultural and societal transition) in leading the family; understanding children’s physiological development; and communicating values to children about postponing sex and promoting
behaviors which support their health and well-being. English version of curriculum is available in the FACT Resources Kit.

- Sexuality Education Begins at Home. This pamphlet is a family guide to talking about sexuality. Available in English and Spanish.
Growing up Girls. This pamphlet discusses what girls need to know about their changing bodies. Available in English and Spanish.

Child Development from 9-12 Years of Age. This pamphlet is designed to show the changes preadolescents go through between the ages of nine and 12. Both boys’ and girls’ issues are addressed. Parents are given tips on how and what to communicate to their children. Available in English and Spanish.

Growing up Boys. This pamphlet discusses what boys need to know about their changing bodies. Available in English and Spanish.

My Brother, 1991, 31 minutes. This award winning video of a Hispanic family dealing with the AIDS-related death of the eldest son includes the following topics: health of mother and child, death, blame, living with HIV, and family communication. The American Red Cross. Available in Spanish with English subtitles.

The Last Train, 25 minutes. This video deals with difficulties a teen girl faces at the beginning of her sexual life. Discusses pressures, myths, and the contradictions she finds in her home, school, and social environment. Available in English and Spanish.

The Blue Pigeon, 11 minutes. This cartoon video explains physical changes and sexual impulses that accompany puberty as well as the emotional and reproductive risks that adolescents face. Available in English and Spanish.

Saxophone, 18 minutes. This video looks at masculine identity problems and social assertiveness as well as different life perspectives that can cause difficulty in communication. Designed to assist families in recovering the emotional closeness between parents and children. Available in English and Spanish.

Between Us, 1988, 88 pages. This training manual presents programs that emphasize the importance of family communication and values. Available in English and Spanish.

New Vision: A Culturally Sensitive Life Planning Curriculum. This English curriculum, which includes a 110-page Spanish section, encourages students to discuss life planning and sexuality with their families and to become familiar with their family’s values and traditions.

Let’s Talk About Sex, 1985. Foster L, Gitchel S. This book, for parents and children, is about puberty. Available in English and Spanish.

E-mail: simujer@ns.tmx.com.ni

• **Para Vivir el Amor sin Enfermedades de Transmisión Sexual.** This 102-page manual containing useful information for facilitators on preparing and conducting activities around adolescent sexual health. Four chapters contain information on STDs, HIV/AIDS, overcoming obstacles, and safe sex. Each chapter contains training steps, background information, discussion questions, and participatory activities. Unfortunately, this otherwise useful resource lacks a table of contents or index. Available in Spanish only.

23. **Georgetown University, Institute of Reproductive Health**
2115 Wisconsin Avenue NW, Georgetown Center, 6th Floor
Washington, DC 20007
Phone: (202) 687-1392
Fax: (202) 687-6846

• **Fertility and Sexuality Awareness for Adolescents: Manual for the Facilitator,** 1997. This 280-page manual is for use by professors, parents, and heath professionals who want to guide adolescents towards healthy sexuality. The manual is divided into eight areas: learning about one’s fertility, avoiding pregnancy, responsibility of being a
father or mother, importance of family planning, caring for oneself, how to create a healthy sexuality, how to say no and alternatives to sex, and human sexual responses. This manual is designed to increase adolescent skills and knowledge around issues of sexuality. The facilitator’s manual is equipped with a teacher’s outline for each session, evaluation materials, activities for use in a classroom, and materials to reinforce fertility and sexuality messages for adolescents (supported by scientific data). Available in English and Spanish.

24. Universal Health Communications, Inc.
The Colonial Center, Suite 202
1200 S. Federal Highway
Boynton Beach, FL 33435
Phone: (407) 731-5881 or (800) 229-1842
Fax: (407) 731-5877

- **Una Conversación Sobre el SIDA**, 18 minutes. This video explains the different ways of contracting and transmitting HIV infection. A family explains how parents cope with talking with their children about HIV/AIDS. Available in Spanish only.

- **Thumbs Up For Kids: AIDS Education**, 23 minutes. This video teaches children about HIV/AIDS and disease prevention. Through song, dance, rap tunes, and visual effects, the children learn that it’s safe to play, share toys and attend class with someone who is HIV infected. Recommended for age levels primary through intermediate. Available in English and Spanish.

- **AIDS: Everything You Should Know**, 20 minutes. This video, hosted by Whoopi Goldberg, helps teenagers to take HIV/AIDS seriously and answers basic questions. Recommended for school students and adults. Available in English and Spanish.

- **Beginnings: You Won’t Get AIDS**. This video provides information about HIV/AIDS through colorful animation and action song. Recommended for age levels junior high school through adults. Available in English and Spanish.

25. University of Washington: Novela Health Education
Campus Box 359932
Seattle, WA 98195
Phone: (800) 677-4799
Fax: (206) 221-4945

- **Canta a la Vida**. This music compact disk expresses compassion and hope about the HIV/AIDS epidemic and the Latino community. Facilitates awareness for adolescents. Includes such artists as Edward James Olmos, Rick Orozco, Joe Lopez/Mazz, Jay Perez, Hugo Guerro, Fandango USA, Noemy, David Lee Garza, Emilio, Joe Jama, Elida Reyna, Amber Rose, Stefani, Nydia, Rojas, Little Joe, Ram Herrera, and Elas Garcia. Available in Spanish only.

26. National Clearinghouse on Families and Youth
PO Box 13505
Silver Spring, MD 20911-3505
Phone: (301) 608-8098
Fax: (301) 608-8721

- **Supporting Your Adolescent: Tips for Parents**, 1997. This document is also available on audio cassette and in the form of camera-ready art. Available in English and Spanish.
• In Our Own Words: Teens and AIDS, 1995. This video profiles five teens infected with HIV through unprotected sexual intercourse. The teens address denial, living with HIV, alcohol and its potential link to risky behavior, condoms, and making healthy decisions. Includes educator’s discussion guide. Available in English (with closed captions) and Spanish.

• Risky Times: How to be AIDS-Smart and Stay Healthy, 1990. This 150-page book for teens profiles young people living with HIV. Chapters cover relevant topics such as denial, the biology of HIV, making healthy decisions, the link between drugs, alcohol & risky behavior, condoms, and HIV treatments & vaccines.
